Toronto, ON | (548) 333-4023

## Education

### Software Engineering Technology – Artificial Intelligence

Expected December 2024

Centennial College – Toronto, ON

GPA: 4.27/4.5 (A)

**Relevant Coursework:** Supervised Learning, Unsupervised Learning, Deep Learning, Neural Networks, Data Structures & Algorithms, Cloud Machine Learning, Big Data Tools, Software Systems Design, Web & Mobile App Development, Java Programming, Software Testing & Quality Assurance, IT Project Management, Business & Entrepreneurship

## Work Experience

### Full Stack Developer, Sun Glow – Toronto, ON (Co-Op & Part-Time)

January 2023 – Present

- Conducted candidate interviews and managed project developments, effectively serving as a team lead
- Spearheaded development and overhaul of 3 websites using Next.js, React, and PHP, enhancing user experience and engagement, resulting in improved website functionality and performance
- Engineered machine learning model based on order history, reducing processing time by 20%, showcasing problem-solving and innovation, and enhancing operational efficiency
- Orchestrated 40% improvement in Sun Glow website SEO post Next.js migration, amplifying organic search traffic, and bolstering online presence
- Conducted Google Analytics research, boosting conversion rate by 20% and website engagement by 10%, demonstrating a data-driven decision-making approach that led to achieving key business objectives
- Recognized for distinguished performance in initial 2 months of co-op with an offer for a continuing part-time role, showcasing consistent excellence and contribution to organizational success

## Projects

### Machine Learning Projects

[github.com/stars/Sunehildeep/lists/machine-learning](https://github.com/Sunehildeep/lists/machine-learning)

- **Chatbot Encoder-Decoder Transformer** - Implemented a transformer model from scratch using TensorFlow, based on Google's Research paper, demonstrating expertise in NLP, scraping datasets, and advanced data pre-processing
- **Text Generator RNN** - Developed a decoder model using TensorFlow for content generation, inspired by GPT models
- **Image Classification CNN Model** - Designed and trained a TensorFlow model for workout recognition, leveraging convolutional layers for precise computer vision tasks
- **Eye Tracker** - Utilized OpenCV for real-time object tracking in computer vision applications, demonstrating adeptness in computer vision and motion detection

### Web Development Projects

[github.com/stars/Sunehildeep/lists/web-development](https://github.com/Sunehildeep/lists/web-development)

- **Chatbox** - Crafted a robust real-time chat application with React, Web Sockets, and MySQL integration

### Software Tools & Applications

[github.com/stars/Sunehildeep/lists/c-applications](https://github.com/Sunehildeep/lists/c-applications)

- **Custom Fans Helios** - Engineered a C# tool for refined user-defined fan curve control in Acer Helios laptops, reducing system overheating incidents by 30% and gaining recognition in the Acer community with over 500 downloads
- **Auto Max Fans Helios** - Developed a lightweight C# application to toggle max fan speed based on system temperature, reducing overheating by 10% and gaining recognition with over 100 downloads

## Skills

- **Programming Languages:** Python, Java, C#, JavaScript, TypeScript, Kotlin, PHP, Pawn
- **Machine Learning (ML) Frameworks:** TensorFlow, Keras, PyTorch, scikit-learn
- **Front-End Technologies:** React, Angular, Next.js, React Native
- **Back-End Technologies:** Chalice, Flask, Node.js, Express.js
- **Cloud Development:** Microsoft Azure, Amazon AWS
- **Databases:** MySQL, Oracle SQL Developer, PLSQL, NoSQL
- **Tools:** Spark, Selenium, Git, Android Studio, Unity, Unreal Engine, Agile/SCRUM, SDLC
